

## Product information

**Antibody name:** anti-CF<sub>1</sub>α (AtpA) subunit of ATP synthase

**Product number:** A02C-1

**Product description:** polyclonal antibody

**Origin:** rabbit

**Immunogen:** isolated CF<sub>1</sub>α subunit of the chloroplast ATP synthase complex from *Chlamydomonas*

**Applications:** Western blot (1 : 10.000)

**Immunocrossreaction:** higher plants, *Chlamydomonas*, cyanobacteria

**Storage:** short term +4°C; long term -20°. Repeated freezing and thawing is not recommended.

**Quantity:** 100 µl

**Protein description:** The chloroplast ATP synthase belongs to the family of F<sub>1</sub>-type ATPases, which are also present in bacteria and mitochondria. ATP synthase generates ATP from ADP and inorganic phosphate using energy derived from a trans-thylakoidal electrochemical proton gradient. CF<sub>0</sub> α subunit is a regulatory peripheral subunit of ATP synthase stator part which binds nucleotides and forms hexameric ring with CF<sub>0</sub>β subunit.

Western blot analysis of *Chlamydomonas* proteins with anti-CF<sub>1</sub>α
