

### Product information

<b>Product name:</b>	anti-Tylosin pab ELISA-Stick with reagents
<b>Product number:</b>	ET-3
<b>Package size:</b>	10 tests
<b>General Description:</b>	Tylosin is a macrolide-class antibiotic used in veterinary medicine. It has a broad spectrum of activity against gram positive organisms and a limited range of gram negative organisms. It is found naturally as a fermentation product of <i>Streptomyces fradiae</i> . Tylosin is used in veterinary medicine to treat bacterial infections in a wide range of species and has a high margin of safety. It has also been used as a growth promotant in some species, and as a treatment for colitis in companion animals.
<b>Principle:</b>	The <i>Tylosin detection reagent set</i> is sensitive and easy to handle test for the detection of Tylosin. The test can be carried out without sample preparation or pre-incubation. Since the test does not require any labour equipment, it is especially suitable for analysis on the spot.
<b>Sensitivity:</b>	Detection limit 1 ng
<b>Sample size:</b>	max. 1 ml
<b>Assay sample type:</b>	any sample
<b>Detection time:</b>	1.5 h
